Washing Money

When it becomes excessively
grimy after passing through
so many,& varied,hands.

Can reek,oh suppose
gentle cycle’d do,but a-
fraid even that could damage;

besides,want process in view
at all times (Good
money could follow bad

sock-to-oblivion route over
the side of agitating tub!). So

propose filling a large glass jar from
decent-enough faucet & adding trace of
liquid hand soap. Moderate shaking,then

another shake in clear water. Next,
drain on paper towels. If you’re

this far with me,get
more scientific & ass-
iduous how-to from RNC.
